SAILING

SEMINAR

The Art and Science of Teaching and Learning Sailing:

The Art and Science of Teaching and Learning Sailing: Everyone learns and teaches differently. Long-time skipper and experienced sailor Rick Morefield will associate things we all learned in elementary school - including on the playground - to understand the FUNdamentals of sailing and to provide other experienced sailors with inventive ways to explain various aspects of sailing. The seminar will focus on how a boat sails, points of sail, and the sailing environment (wind & water). Participants will explore books, apps, and other resources and share teaching and learning experiences.

Sponsored by Singles on Sailboats

To sign up online: www.singlesonsailboats.org Then click on "Feb 10 Sailing Seminar" link.
